

VRIS UPDATE

HELPS Brain Injury Screening Tool August 3, 2007 Number 94

SUMMARY OF UPDATES

The Helps Brain Injury Screening Tool presentation is now available in a video format on VRIS. The video outlines a rationale for using brain injury screening tools, addresses HELPS administration and scoring, describes the current protocol for data collection and offers suggestions for assessment activities following a positive screen. Power Point slides of the presentation, the HELPS Tool and protocol are also available to print prior to viewing the video. All offices will also receive DVD copies of the video presentation. This allows staff the option of either watching the video via streaming or on DVD.

VRIS POSTING

The HELPS Brain Injury Screening Tool presentation is on VRIS: Multi-Media Materials: Streaming Videos: Helps Presentation.

TEAM COMMUNICATION

Office Directors should discuss this information at their next Team Meeting. Office Directors should include this as a part of their training protocol for new staff.
